PROFESSIONAL SUMMARY

Software development professional with over one year of proven experience working with Java and Vue.js. Experienced in supporting clients and providing guidance on how to effectively use system tools and features. Strong planning and organizational skills, with the ability to manage and contribute to the development of new projects. Excellent communication skills, an innovative mindset, and a continuous drive to learn and adopt new technologies to solve the everyday challenges faced in software development.

EXPERIENCE

Junior Software Development Analyst – Cilia Tecnologia **Jan 2025 - Jan 2026**

- Responsible for the maintenance, enhancement, and development of new features for the Cilia Oficinas system, addressing issues, implementing improvements, and meeting product requirements.
- Started my professional career at Mecanie as an intern, working on system maintenance, bug fixes, and enhancements. Following the company's acquisition by Cilia Tecnologia, I was hired as a Junior Software Developer.
- Worked closely with the Support Team, providing technical guidance on system functionality and tool usage, assisting with the analysis and resolution of customer inquiries and reported issues.
- Developed and maintained features using Java and Spring Boot on the back end and Vue.js on the front end, applying software development best practices and ensuring integration between different application layers.
- Participated in the migration of the GDO system's front end from Angular to Vue.js, from planning through implementation, including adapting existing features and components and replacing Angular-specific resources with equivalent Vue.js solutions.
- Participated in planning meetings and migration task organization, using Jira and Scrum and Kanban methodologies to track progress and distribute tasks.
- Responsible for the development and maintenance of the electronic tax document issuance module, working from requirements gathering and tax regulation analysis through to back-end implementation.
- Developed business logic using Java and Spring Boot for electronic tax document issuance, including validations, mandatory fields, tax rates, and tax calculations such as ICMS, IPI, PIS, and COFINS, taking into account the specific requirements and regulations of each Brazilian state (UF) and issuance scenario.
- Conducted research and analysis of tax legislation and regulations to translate tax requirements into business rules and software solutions integrated into the system's operational workflows.
- Developed the integration with the Vinco API to communicate with electronic tax document issuance services, implementing submission, validation, processing, and response-handling workflows.
- Implemented features related to NF-e (Brazilian Electronic Invoices) and other electronic tax documents, including automatic document generation based on Service Orders.
- Developed a feature for generating and previewing electronic tax document XML files before submission, allowing users to review information and identify inconsistencies before processing.
- Implemented validations and error-handling mechanisms throughout the tax document issuance process, contributing to greater reliability and consistency of generated documents.

Software Development Intern – Mecanie **Apr 2024 - Dec 2024**

- Worked on the maintenance and enhancement of the Mecanie system, fixing bugs, making adjustments, and developing new features based on product requirements.
- Developed new features using Java on the back end and Vue.js on the front end, contributing to the continuous improvement and enhancement of the tools provided by the system.
- Implemented new fields in product and service tables using PostgreSQL, preparing the database structure to support the information required by the system's tax module.
- Developed new dashboard gadgets, improving the presentation of workshop performance indicators and charts and making information easier for users to visualize and understand.
- Fixed typos and made content adjustments across the system's user interfaces, contributing to improved presentation and user experience.
- Worked closely with the Customer Support Team, assisting users with the Mecanie system's features and contributing to the analysis and resolution of user inquiries and system-related issues.

Customer Service Representative – Águia Mármores **Jan 2015 - Dec 2023**

- Provided in-person and telephone customer service, offering support, answering inquiries, and assisting customers with service bookings and purchases.
- Prepared quotes and scheduled services for customers using the GestãoClick management system.
- Issued Service Orders (SOs) after closing sales and forwarded the relevant information to the production team, following up on the process until delivery dates and locations were coordinated with the installation team.
- Managed and organized inventory of products and work tools, using Microsoft Excel spreadsheets to track and record items.
- Issued invoices, ensuring that all necessary information was properly recorded to formalize services and sales.

EDUCATION

Bachelor's Degree in Computer Science – Completed **Completion Date: 2nd semester of 2024**

University: Universidade Paulista (UNIP) – Alphaville
Duration: 8 semesters

CERTIFIED COURSES

- 2024 – Vue 3: Exploring the Framework – Alura – 10 hours
- 2024 – Java: Applying Object-Oriented Programming – Alura – 10 hours
- 2024 – Vue 3: Advancing in the Framework – Alura – 8 hours
- 2026 – Java and JDBC: Working with a Database – Alura – 10 hours

SOFTWARE SKILLS

- Java spring boot
- Vue.js
- Slack
- Jira
- Typescript
- PostgreeSql
- Confluence
- Bitbucket
- HTML
- CSS
- Javascript

SOFT SKILLS

- Teamwork
- Customer-oriented approach
- Responsibility
- Integrity
- Learning and exploring new technologies
- Goal achievement
- Project negotiation
- Effective communication
- Organization
- Planning
- Innovation
- Documentation

LANGUAGES

- Portuguese – Native
- English – Intermediate
- Spanish – Basic

PROFESSIONAL OBJECTIVE

Junior Full-Stack Developer, Junior Software Development Analyst, Junior System Maintenance Developer, Junior Programmer, Junior Java Backend Developer, Junior Vue.js Frontend Developer.
